One Goal, Many Pathways

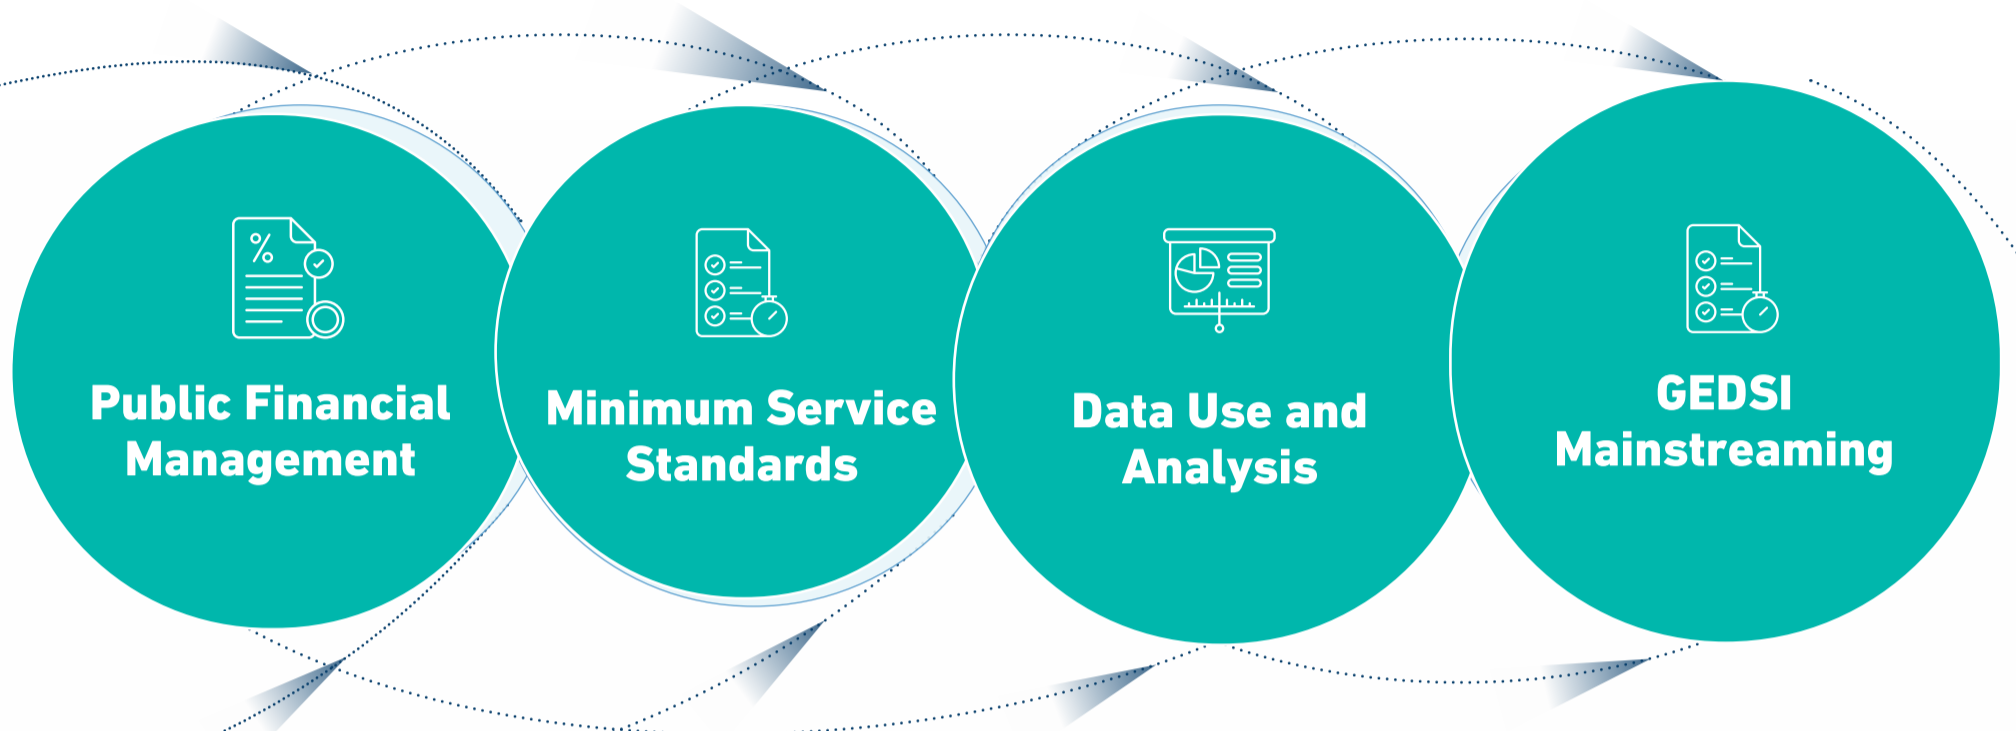

SKALA collaborates with other Australia-Indonesia Partnership Programs to Strengthen Inclusive Governance and Basic Services

Collaborating for impact

Building inclusive governance and basic services requires collective effort. That is why SKALA works with other Australia-Indonesia partnership programs to strengthen governance systems. These include INKLUSI, the partnership for an inclusive society; INOVASI, the partnership for basic education; and KIAT, the partnership for infrastructure.

Aligning with Indonesia's Development Priorities

SKALA's collaboration with INKLUSI, INOVASI, and KIAT supports inclusive policies through technical assistance and shared expertise, in support of Indonesia's development priorities. This collaboration focuses on four key areas:

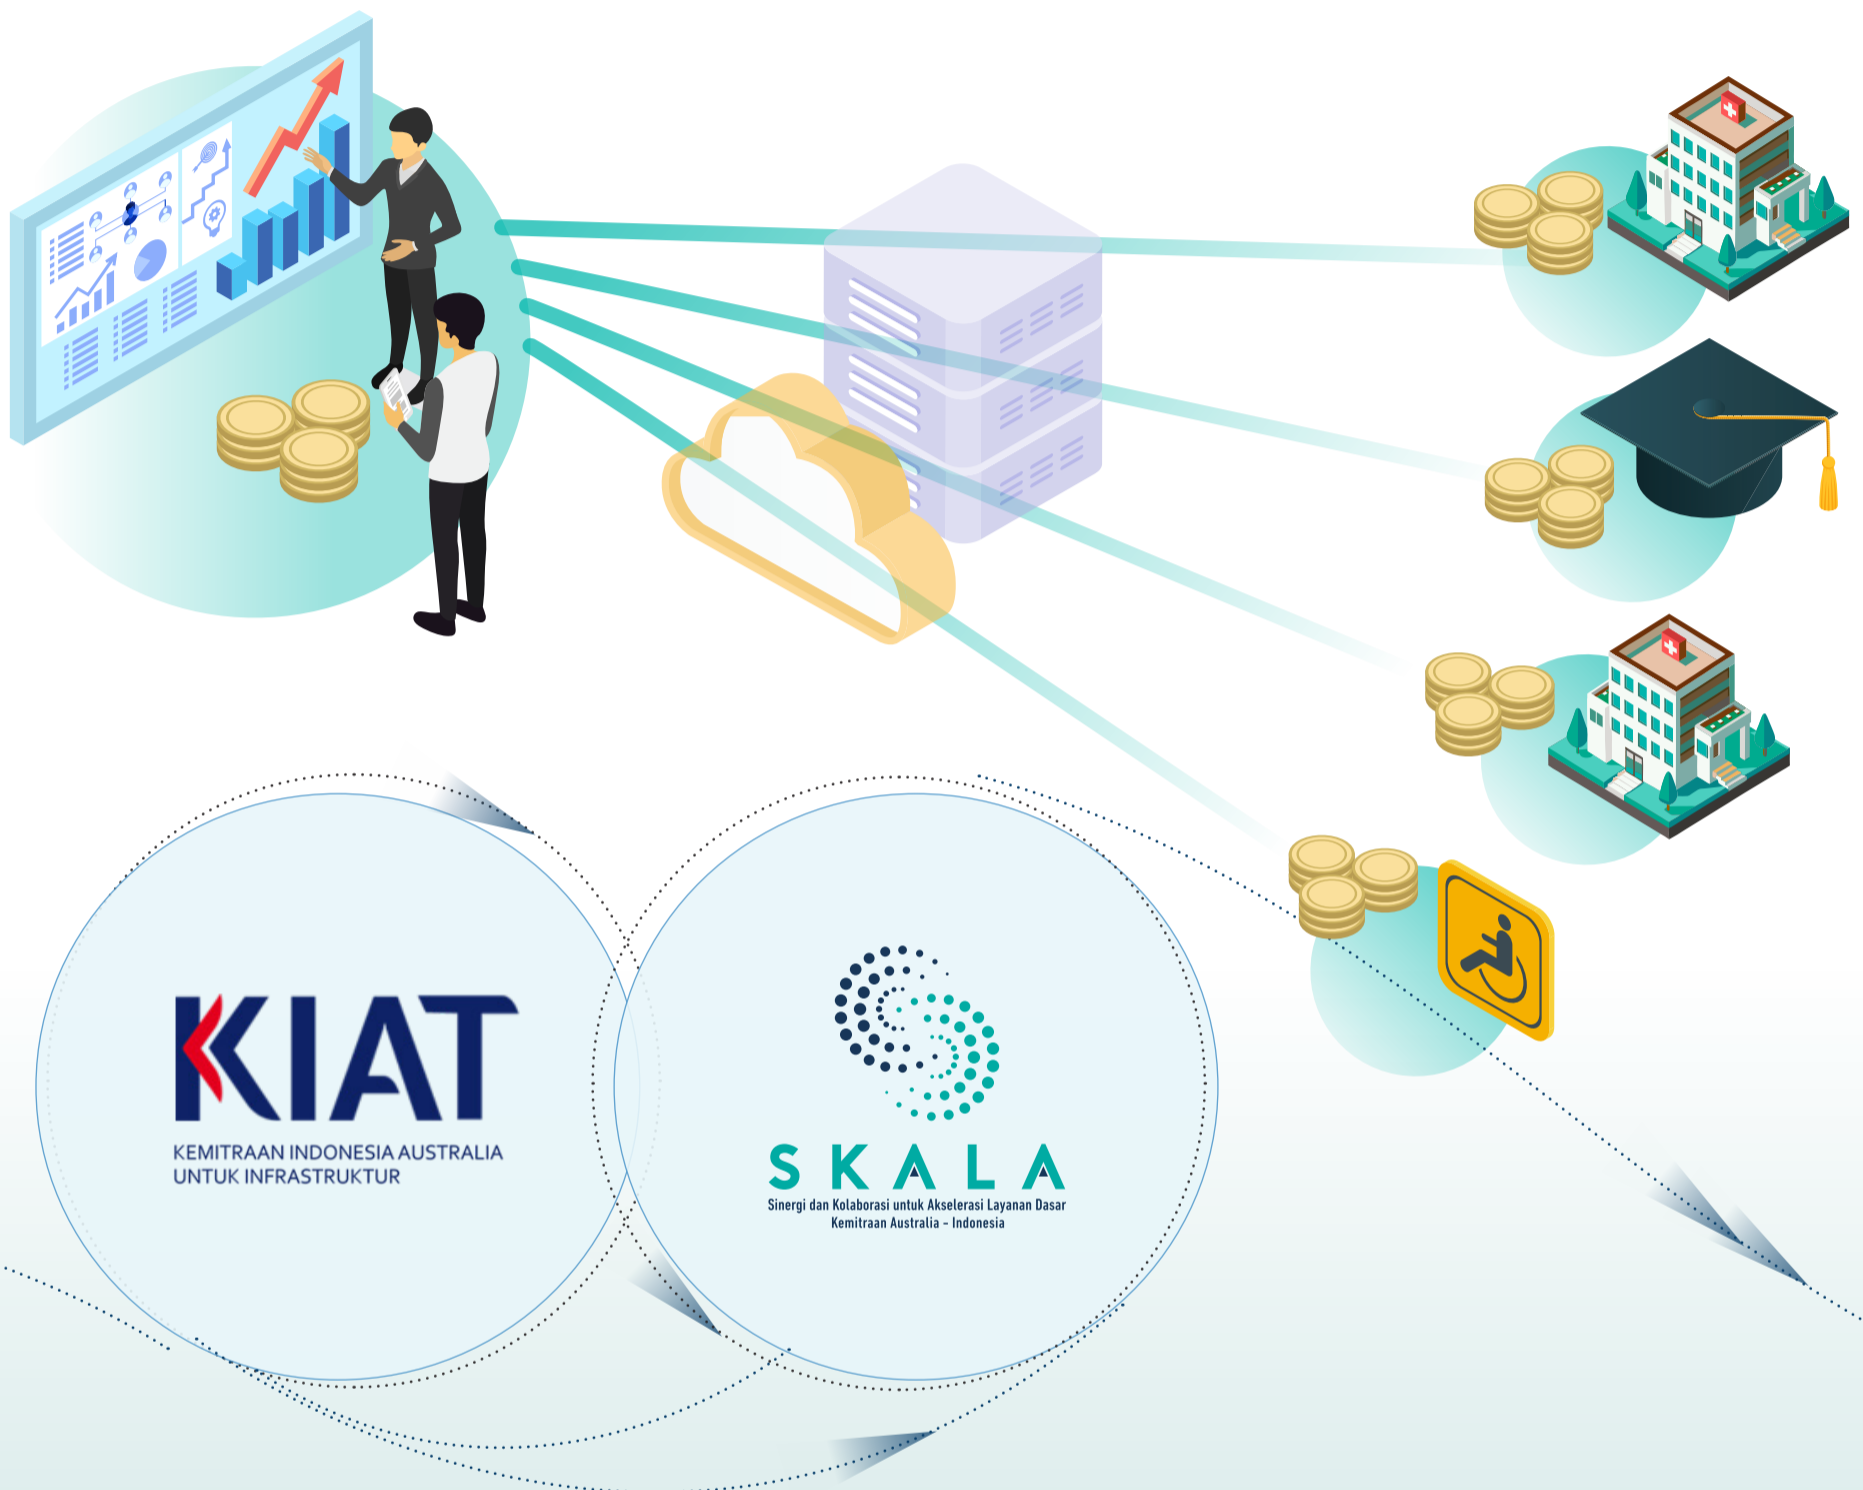

1. Public Financial Management
2. Minimum Service Standards
3. Data use and analysis
4. Gender Equality, Disability, and Social Inclusion mainstreaming

National Collaboration for Disability Inclusion Policy

At the national level, SKALA and INKLUSI jointly supported the preparation of the Presidential Report on the implementation of the National Action Plan on Persons with Disabilities 2020–2024. This contribution is a strategic step towards strengthening policy on disability rights over the next five years.

Innovative Financing for Inclusive Basic Services

Fiscal capacity is essential to ensure the sustainable delivery of basic services. In collaboration with KIAM, SKALA is exploring an innovative financing model that blends specific fiscal transfers to strengthen local financing for inclusive development.

Evidence-Based Planning for Climate Adaptation Action

In SKALA's partner provinces, the impacts of climate change are already being felt. In collaboration with UN Global Pulse Asia Pacific, SKALA will use the analysis of sea level rise data to support provincial governments integrate climate risks into development planning, to inform the design of climate-resilient basic services.

Gender Responsive Planning and Budgeting in NTB

In West Nusa Tenggara (Nusa Tenggara Barat/ NTB), SKALA collaborated with INKLUSI to deliver training on Gender Responsive Planning and Budgeting. This initiative supports local governments in designing budgets that are more aligned with the needs of women and vulnerable groups.

GEDSI Mainstreaming in Regional Policy in North Kalimantan

In North Kalimantan, SKALA, INKLUSI, and INOVASI are working together to mainstream GEDSI principles into regional policy frameworks. This includes support for the Regional Action Plan for Persons with Disabilities, the Out-of-School Children Action Plan, and efforts to strengthen Gender Responsive Planning and Budgeting.

Strengthening Civil Society Participation in Maluku

In Maluku, SKALA partnered with *Rumah Generasi*, INKLUSI's partner, to strengthen civil society participation in public consultations for the Regional Action Plan for Persons with Disabilities. SKALA also supported capacity building through training sessions at the Gender Responsive Planning and Budgeting Clinic in Ambon.

Breaking Silos for Stronger Collaboration

Cross-program collaboration can help close gaps, foster innovation, and expand the impact of the Australia and Indonesia Partnership. These joint efforts are strengthening synergy between national and local governments, and deepening cross sector collaboration, with the shared goal of reaching everyone, right down to the last mile. One partnership, one impactful reform at a time.
